

## One Proposal, Triple Chance to Get Funded

Are you a progressive and ambitious postdoctoral researcher interested in joining a prestigious university in Life Sciences?

### Benefits

- Research experience aiming at top rated publications
- Collaboration with top scientists in Life Sciences
- Background of the strong organization experienced with MSCA projects, preparatory workshops aimed on successful proposals, potential to participate in interesting projects

### Research topics

- Bioinformatics in Stem Cell Neurobiology
- Trace Elements in Foodstuffs and Human Diet
- Health System Efficiency
- Stem Cells and Developmental Biology
- Mechanisms and Functions of Primary Cilia
- Chromosome Segregation During Gametogenesis

#### How can you apply?

Submit an application including a CV, list of publications and half-page long abstract of your project to:
